

Reorder Routes

Last Modified on 06.09.23

Newly created routes appear at the bottom of the **Routes** table. To make actions run using a route that is lower in the list, such as a Recast Proxy route, you must move that route above the Console Extension route in the table.

To reorder routes, drag and drop them into the desired order and save your changes.

NOTE: **Route ID** values do not reflect the order of priority for routes.
