

# Retrieve a Temporary Password

Last Modified on 09.20.23

You can retrieve a temporary password on the Privilege Manager **Agents** page. A record of retrieved passwords is available on the [Retrieved Passwords Report](#).

To retrieve a temporary password:

1. On the **Agents** page, click the Key icon to the left of the agent.

## Agents

<div><div>Search...</div><div>Export</div><div>Refresh</div></div>		
Drag a column header and drop it here to group by that column		
Actions	Name	Domain
<div><div><div></div><div></div></div></div>	cmcbhekcl01	contoso.com
<div><div></div><div></div><div></div><div></div></div>		1 - 1 of 1 items

2. In the side panel that opens, select the local user **Account** for which you want to see the password.
3. Click **Retrieve**.

The **Generated password** appears and can be copied by clicking the Clipboard icon.

4. Click to **Regenerate** the password on the client.
