

# Create a Proxy Route

Last Modified on 06.09.23

A route determines the proxy to which your Recast actions are sent. In order for the Recast Management Server to run actions through the Service Account Proxy, create a proxy route that uses the service account.

To create a Recast Proxy route:

1. In your Recast Management Server, navigate to **Administration > Routes**.
  2. In the main window, click **Create**.
  3. Set route **Type** to **Recast Proxy**.
  4. Select your service account.
  5. Set the **Role** to **Administrators**.
  6. Click **Create**.
  7. On the **Routes** page, click **Save**.
